

Photizo Vetcare is CE approved for the treatment of pain, musculoskeletal injuries and skin conditions for animals.

Conditions that can cause pain:

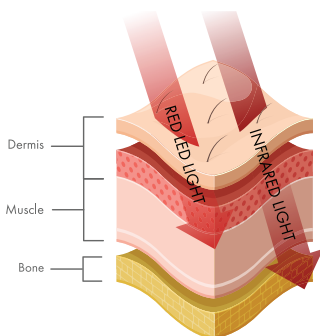

- Skin conditions: wounds, lacerations, abscesses, saddle sores, skin allergies, eczema, etc.
- Musculoskeletal problems such as arthritis, tendonitis, overuse injuries and muscle spasms
- Post-op: any area treated surgically, including skin grafts
- Corneal ulcers, viral-related conditions and sinusitis.

The natural healing power of light therapy:

Throughout the ages, sunlight (as the earliest form of phototherapy) has been known to have both healing and wellness properties. Light is energy, and energy sustains life – it cannot be destroyed, but it can be transformed into other forms.

Photizo LED light therapy harnesses the healing power of red and infrared light at specific wavelengths and frequencies for accelerated healing by activating the body's own pain and relaxing 'medication'.

Benefits:

Non-invasive, painless LEDs, with no recovery time needed.

Increased blood flow into the area being treated, ensuring waste is quickly removed from the area.
